9036-62-4C

February 27, 1962

Dear Jim:

Attached is a copy of the costs incurred from the date of authorization to the date of completion on our Project 9036. This project, you will recall, was instituted at your request in the month of December for the purpose of fabricating mod kits to the viewers at Omaha. The attached figure reports the total cost incurred from the date of the authorization through the date you requested we stop work. As you recall, I still have no authorization to start work. Also, I assume that we will be entitled to at least 8% profit on this work. Please advise me as to what action you would like me to take in order to effect settlement of this possible thousand dollars out of Joe Idiot's pocket.

Very truly yours,

Contracts Manager
